

Powering Resilient Defense Connectivity: The PdM WESS Program and DoD SATCOM Support

Managing acquisition, development, and sustainment of critical satellite communications infrastructure for over a decade

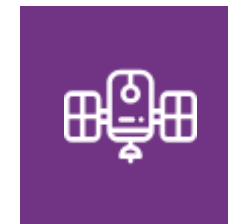

Maintaining Critical Strategic Communications

Comprehensive Support for DoD SATCOM and Defense Systems

01 PdM WESS system-of-systems architecture supports

- Strategic communications infrastructure supporting varied defense needs
- Presidential communications systems ensuring secure command
- Defense Information Systems Network (DISN) for data transmission
- Ballistic Missile Defense System (BMDS) protecting national security

02 IAP's WESS SATCOM Support Contracts provide

- Facility, sustainment, and maintenance services for Global, Joint, and Wideband DoD SATCOM infrastructure
- Support across various SATCOM programs and associated equipment worldwide

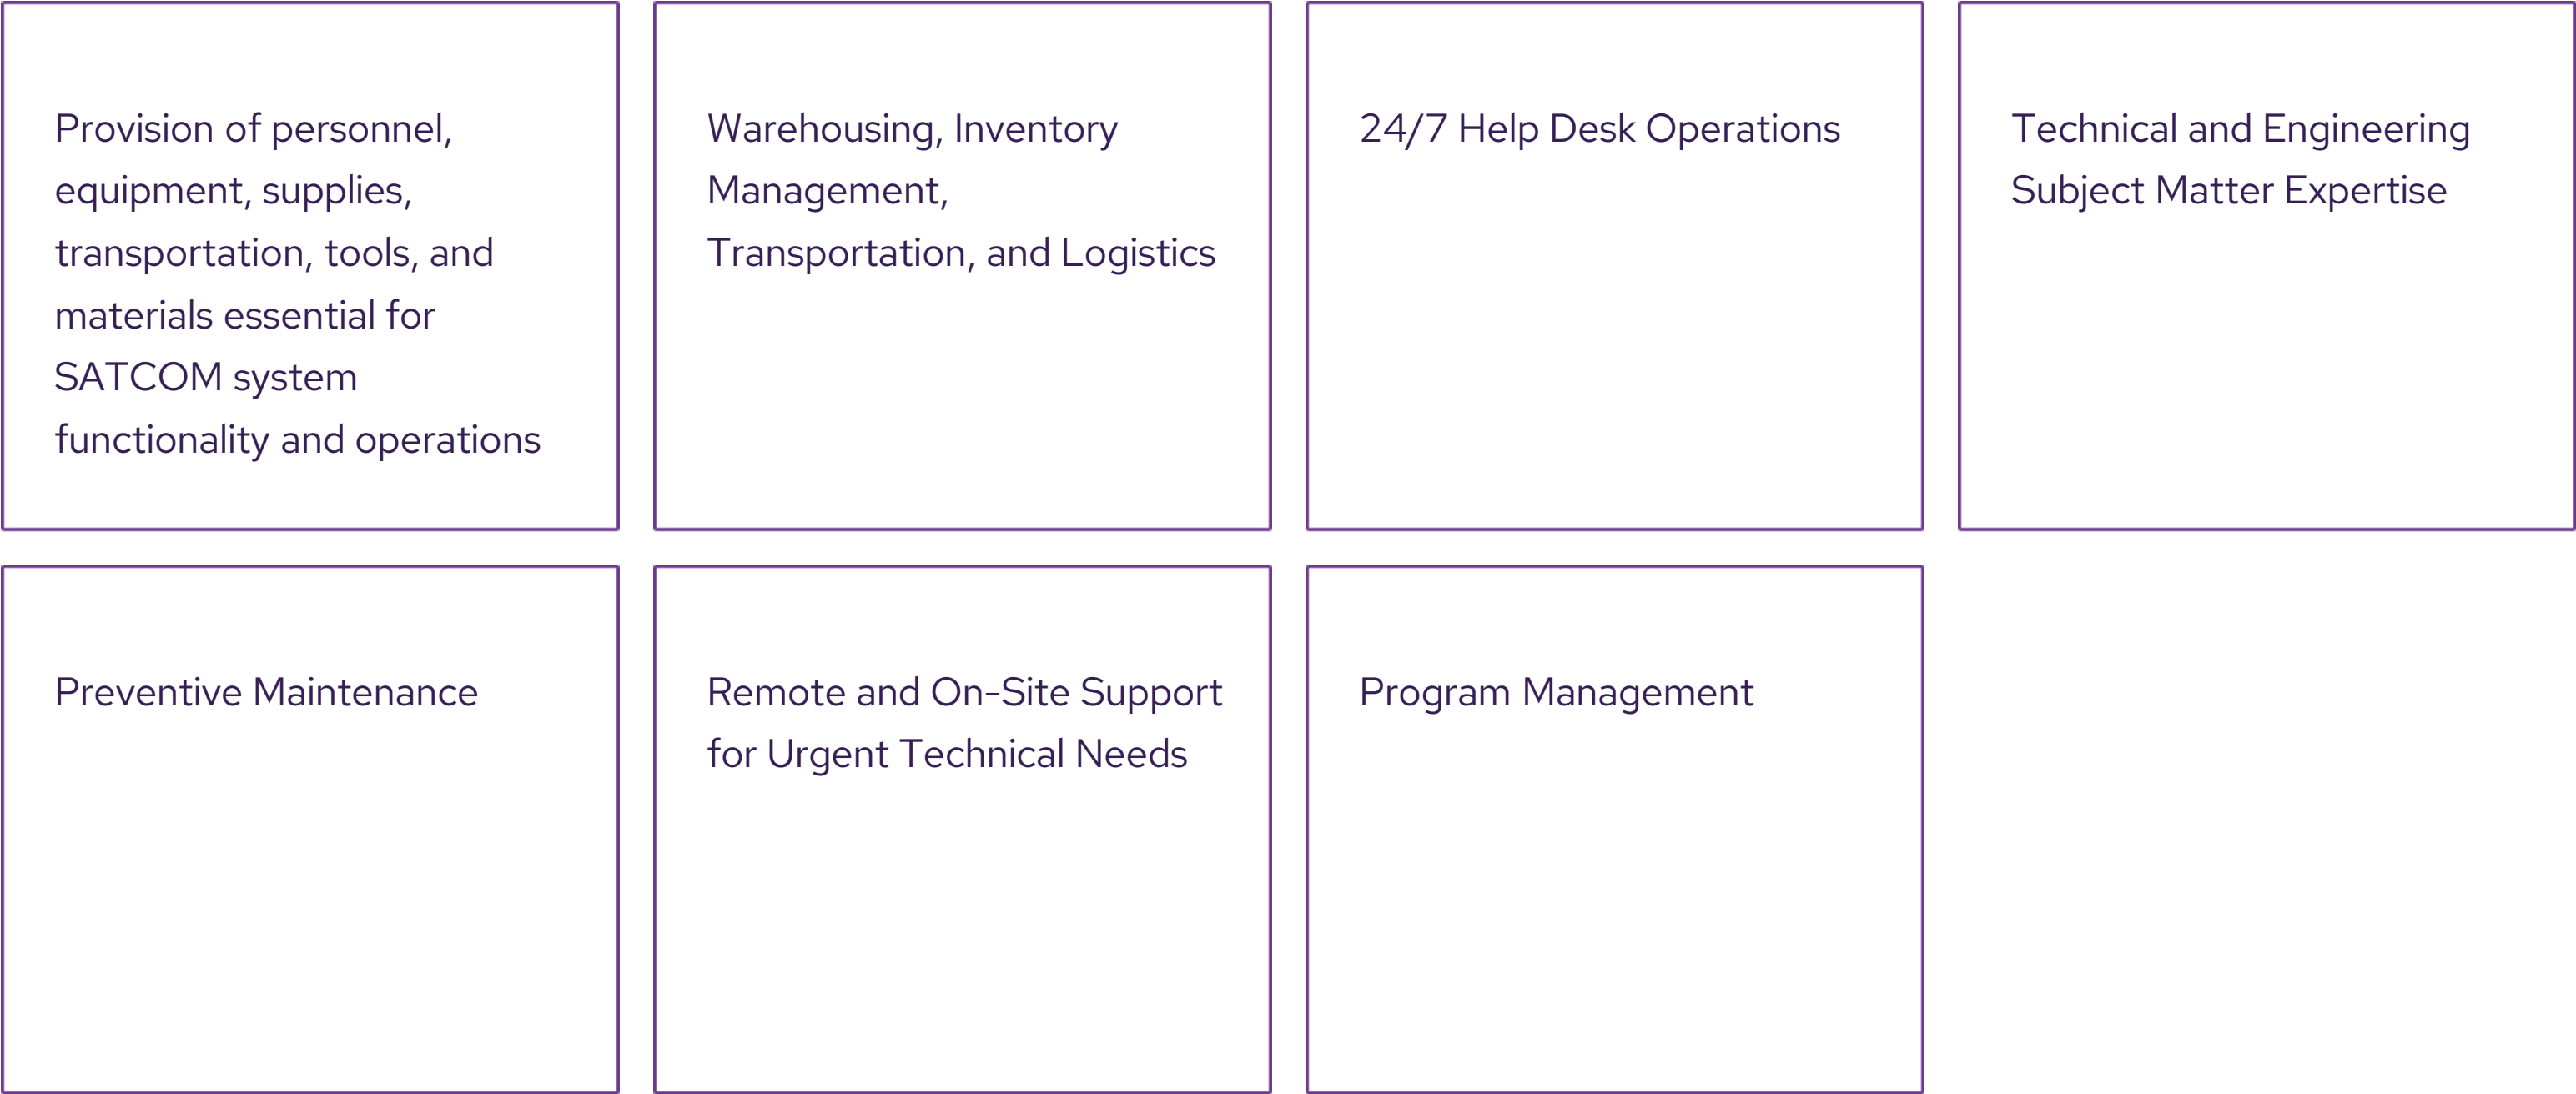

03 Provided services include

- On-site technical support ensuring effective operational readiness
- Installation of systems with precision to guarantee functionality
- Site planning and preparation for optimal system deployment
- Warranty management to protect and sustain equipment investments

Driving Strategic Network Reliability

Comprehensive operational support to maintain SATCOM system functionality and operations

IAP's Competitive Edge Delivers Performance & Global Reach

Sustaining SATCOM infrastructure worldwide with proven contract excellence

Sustains satellite terminal and baseband systems at over 50 SATCOM facility locations worldwide

Provides SATCOM facility power infrastructure upgrades to ensure system reliability

Ensures access to technical support and components via 24/7 SATCOM Systems Help Desk and a 160,000 sqft. SATCOM Support Warehouse

Delivered multiple multi-hundred-million-dollar WESS contracts on time and within budget

Commitment: Delivering exceptional contract execution sustaining global connectivity for every Combatant Command
